

# WHITEPAPER

TRADE AS FAST AS LIGHTNING WITH BOLTBOT

# INTRODUCTION

Welcome to BoltBot, the game-changing platform that is here to transform your cryptocurrency trading experience. Our mission is simple: to empower traders of all levels with a seamless and efficient solution in the ever-evolving world of digital assets. We understand the importance of speed, security, and profitability in the cryptocurrency market. That's why we've built BoltBot from the ground up, with a focus on lightning-fast transactions that ensure you never miss out on lucrative trading opportunities.

At BoltBot, your security is our utmost priority. We've implemented robust measures to safeguard your transactions and protect you from potential risks that exist in the crypto space. You can trade with peace of mind, knowing that your assets are secure. But BoltBot is more than just a platform – it's your companion on the exciting journey of cryptocurrency trading. We've created an intuitive and user-friendly interface, designed to empower traders of all backgrounds. Whether you're a seasoned professional or new to the game, BoltBot provides the tools and resources you need to make informed decisions and maximize your profits.

We're constantly pushing the boundaries of innovation. Our team is dedicated to staying ahead of the curve, leveraging the latest technologies and industry best practices to ensure that BoltBot remains at the forefront of the cryptocurrency trading landscape.

So, join us as we embark on this thrilling adventure together. Discover the power of BoltBot and unlock the potential of the cryptocurrency market. With BoltBot by your side, you can trade with confidence, knowing that you have a reliable and efficient platform supporting your trading journey.

Welcome to BoltBot – where your trading success begins. Let's navigate the world of cryptocurrencies together and make the most of this exciting digital frontier.

A revolutionary take on tiers

# BOLTBOT TIER SYSTEM

- Revenue sharing
- Presale sniping
- Multi wallet destriction
- AI Automated trading
- Profit forecasting
- Saturation indicator
- Token volume vs Market volume indicator
- 0 Fees

Available to anyone holding  
over 7,500 \$BOLT (0.75%)

The following pages will go through each tiers features in more detail.

# TIER 3

## FEATURES – PART 1

Features that any premium trading bot would be proud of. Available at launch to all holders of \$BOLT. With trade fees of 0.85%.

### Lighting fast Buy/Sell Function – 0.85% fee

BoltBot interacts directly with Smart Contracts via the Blockchain. This means that all transactions are signed off at lightning speed, proving BoltBot to be one of the fastest Trading bots in its class.

### Bolt Sniper – 0.85% fee

BoltBot sniper allows users to be among the first buyers during a token launch. This function must be set up prior to a launch, on a 100% safe token. BoltBot is not responsible for anyone sniping a scam coin (Honeypot, Rugpull, etc.) and we highly encourage everyone to DYOR before any attempt.

Nb: ahead of the competition, Bolt sniper works on every single function leading to a trade opening (Add Liq, Enable Trade, Open trade, etc.)

### MEV protection / Private Transactions

BoltBot uses encrypted nodes to securely sign Transactions on the Blockchain. Alongside the obvious benefits, this will protect Users from MEV Attacks and Sandwich Bots.

# TIER 3

## FEATURES – PART 2

Each feature available in tier 3 and all tiers will run flawlessly. Our dev team has tested each aspect of the bot meticulously and will continue to do so for all future features.

### Multi-Wallet Aper – 0.85% fee

Our Multi-Wallet Aper allows users the ability to invest into their Token of Choice through Multiple Wallets simultaneously. Simple call the function, and BoltBot will invest the moment Trading is enabled and Liquidity is added. Tier 3 allows for a maximum of 5 wallets for this feature.

### Custom Multiplier Auto-Sell Ability – 0.85% fee

BoltBot allows users the ability to select their preferred Exit Point, for peace of mind. Once a Users Investment has reached the multiplier selected, BoltBot will Auto-sell all Tokens.

### Order placing

Using the same mechanism as the Auto-Sell, Users can place different Buy-Orders to buy their Token of choice, at the price a User wants. Once the Token reaches the price a User has fixed, BoltBot will trigger the order and send the User a confirmation message.

## The BoltBot Investor Index (BII)

BoltBot will compile Data from Wallets holding specific Contract Address', accessing their Wallet Size in ETH/USD and allocating them into different groupings, otherwise known as the BoltBot Investor Index.

### Investors will be grouped into the following:

- < 200 USD – Shrimp 🍤
- < 2000 USD – Dolphin 🐬
- < 20000 USD – Whale 🐳
- > 20000 USD – Humpback 🐳

# TIER 2

## FEATURES – PART 1

Tier 2 BoltBot will include all features outlined in Tier 3, with the additional implementation of Features designed to assess a Tokens Security and Investment desirability.  
Available 2 weeks after launch.

## Sustainability

Monitoring the sustainability of a project based on the type of investors allocating capital to the token.

## Whale Watching

Capital flows into tokens through the tracking of whale wallets. BoltBot allows investors the ability to track these whales and monitor the level of high capital investors within a certain coin.

## Alpha Indicator

High capital investors (whales) usually invest into well established coins. If you see these investors within a coin at an early stage, it can provide users with an advantage at accessing whether a Token is 'Alpha'.

# TIER 2

## FEATURES – PART 2

All holders of at least 0.5% \$BOLT will have access to all tier 2 and 3 features. With all fees being reduced to 0.5%.

# TIER 1

## FEATURES – PART 1

A series of premium features available to those who hold at least a 0.75% supply of \$BOLT. Available 4 weeks after launch.

### Revenue sharing

Tier 1 Access will allow users to benefit from our Revenue Sharing Scheme. All Profits made from transactional Fees on BoltBot will be fairly allocated to all Users, dependant on Holding Size.

### Presale sniping

Snipe a multitude of presale platforms for the highest chances of getting into a project very early.

### Multiwallet derestriction

Tier 1 access allows unlimited Multi Wallet Sniping, allowing for maximum gains.

### Automated trading based on AI

Top Gainers based on StringKeys scraped from Dextools BoltBot will give users a User Friendly view of their historical best/worst performers. The AI will allocate a Users Top Performers to specific Trends, and notify this user once a similar trend is Emerging/Emerged.

# TIER 1

## FEATURES – PART 2

Along with tier 1 features, all tier 1 holders will have access to all tier 2 and 3 features. With all fees being reduced to 0%.

### Profit forecasting

BoltBot will secure positions when it deems a Token 'Topped'. This data will be accessed by comparing Buy vs Sell Pressure.

### Saturation indicator

BoltBot will use KeyString Data to access how many times a Word associated to a Trend has been deployed, giving our AI an understanding of how Saturated a particular Trend may be. This will be delivered as a Metric to assist manual Investment.

### Token Volume vs Market Volume Indicator

BoltBot will understand where a specific Token is ranking amongst all other Tokens allocated to its Trend Category. This allows our AI the ability to access whether a user can expect an influx of Volume, or a decrease in Buy Pressure, resulting in a Sell-off. This will allow users the ability to understand whether their token is over or underperforming vs the Market

# ROADMAP

## STAGE 1

- Whitepaper Release
- Website V1 Release
- \$BOLT Token Launch on Uniswap
- BoltBot Tier 3 Live – Incremental release of the following functions:
  - Lightning Fast Transactions (buy/sell)
  - BoltBot Sniper
  - Multi-Wallet Aper
